

CULVER'S OF KANSAS CITY

Mr. Dave Magee
Erv's Home Center
1800 East Santa Fe
Olathe, KS 66062

Dear Dave:

Thank you for introducing us to and installing the Aqua-Air built in total cleaning system. Culvers is a restaurant dedicated to providing good food at reasonable prices in a clean and sparkling environment with a staff that is courteous, friendly, and helpful.

The Aqua-Air System is perfect for helping us to maintain an immaculate restaurant. We can clean spills in the dining area leaving no sticky residue while our guests are eating. When we clean the food preparation areas, the floors are clean and dry when we finish. In the restrooms, we do not have to physically touch the surfaces in order to clean and disinfect them.

Thanks to the efficiency and effectiveness of your system, the cleaning process takes less time to complete, is more thorough than other methods, and is actually somewhat enjoyable for our crew. We have eliminated the need for mops and buckets and we are using less chemicals by eliminating measuring errors.

We have realized economies in the hours it takes to clean, we have reduced the complaints of employees about cleaning, and we are finding that our team does a better job of cleaning because your system has made it less difficult.

You have my full endorsement of your product and I wish you continued success.

Best regards,

Paul Clause
Owner/Operator
